Note:

Please note, if a legislator did not take at least 50% of the votes between both the 2021 and 2022 sessions we did not provide a Legislator Score for them.

We did provide a Legislator Score to new members for HB 4002 B as it was the only priority bill for the 2022 Short Session.

*Representative Scharf - Took office at the end of the 2021 Legislative Session and did not record any votes.

*Senator Manning Jr. was not present for enough of the 2021 Legislative Session to record votes.

*HB 2638 was a motion to withdraw from the House and did not have a vote in the Senate.

*SB 842 was a motion to withdraw from the Senate and did not have a vote in the House.

Bill Explanations

HB 2021 C

HB 2021 was highly controversial as it aims to phase out natural gas as an electric generating resource in Oregon by 2040 and make Oregon's electricity grid reliant on hydropower, solar and wind power. More specifically, HB 2021 requires electric utilities to derive their electricity from 100% clean, emissions-free sources by 2040. Many in Salem considered this legislation a follow up to Cap-and-Trade, particularly since DEQ does not have the authority to regulate the generation of electricity outside of Oregon.

HB 2638

HB 2638 Limits liability for certain claims for damages arising out of acts or omissions taken during COVID-19 emergency period in reasonable compliance with government guidance related to COVID-19.

HB 3389

HB 3389 Extends look-back period used to determine Unemployment Compensation Trust Fund solvency level from 10 years to 20 years. Provides that calendar years 2020 and 2021 may not be considered high benefit cost period for purposes of making determinations of solvency level of fund. Provides that employers' experience ratings used to determine 2020 unemployment insurance tax rates shall be used to determine rates for 2022, 2023 and 2024. Provides deferral of up to one-third of 2021 unemployment insurance taxes for employers whose tax rates increased by 0.5 percentage points or more from 2020 to 2021. Authorizes forgiveness of percentage of deferrable taxes according to tax rate increase brackets. Reduces fund adequacy percentages used to determine employer tax rate schedules. Broadens kinds of property that may be received for Unemployment Compensation Trust Fund.

SB 139

Pass-Through Entity Tax Changes (SB 139): SB 139 would eliminate the reduced tax rate for pass-through entities with more than \$5 million in annual net income. Businesses with less than \$500k in net income would get a tax reduction from 7.2% to 7%. And businesses with net income between \$500k and \$1 million would see a rate reduction from 7.6% to 7.5%.

All businesses – in order to qualify for the lower tax rates – would be subject to an owner-employee ratio test or a three-year average limitation on distributions of income as a percentage of ordinary business income. Overall, the bill raises approximately \$30 million in tax revenue at time when state government is flush with revenue.

SB 193

SB 193 repeals Oregon's \$500,000 statutory limit on non-economic damages in personal injury cases. OSCC has successfully opposed this legislation for several sessions, but in 2021 it was sold as a mere formality - a "statutory clean up" – in the wake of the 2020 Busch decision. It was also combined with the requirement that all guilty verdicts in criminal cases must result from unanimous jury decisions.

SB 582

One of the major environmental bills of the session, SB 582 directs the Oregon Department of Environmental Quality (DEQ) to make changes to modernize Oregon's recycling system and to establish statewide recycling reduction goals. Under the bill, manufacturers of covered products are required to register each product, pay a fee, and participate as a member of a producer responsibility organization (PRO). Covered products include all types of material to be used to "contain" or "protect" products—boxes, bags, takeout containers, and wrappings. The fee schedule will be determined later, as the majority of program components, including PROs are effective in 2025. According to the DEQ, the estimated costs for the program would be \$83 million. These costs would be covered by manufacturers of the covered products, and then likely passed along to purchasers of the product and consumers who pay final costs for goods impacted by SB 582.

HB 4002 B

HB 4002 B Prohibits employers from permitting or requiring agricultural workers to work in excess of maximum allowable hours unless workers are compensated for overtime hours worked. Specifies exemptions to overtime compensation requirements. Requires Employment Department, in consultation with Bureau of Labor and Industries, Department of Revenue and State Department of Agriculture, to submit report to interim committees of Legislative Assembly related to agriculture on identified economic impacts of overtime compensation requirements under Act. Requires division of Oregon Department of Administrative Services that serves as office of economic analysis to include in economic forecast for biennium any available relevant economic and wage data related to agricultural economy as impacted by overtime compensation requirements.

SB 842

SB 842 Creates income tax subtraction for recovery rebates paid to personal income taxpayers. Directs Department of Revenue to make refund payments of overpayments due to operation of subtraction as soon as practicable. Applies to tax years beginning on or after January 1, 2020, and before January 1, 2022.
